Fallen Art Nouveau

"She felt herself swallowed up in the scorn of these virtuous creatures, who had first sacrificed, then rejected her as a thing useless and unclean."
-Guy de Maupassant, 'Boule de Suif' 中

Study of Fringe textile

With just simple knot and tangle it was tried to create new textile, rather than clean hanging detail on the bottom of garments.

Tangled and Weaved Fringe

The process of decaying and deconstruction cannot always be in the order or beautiful.

I tried to find the beauty from this chaotic development of decaying. The laces of flower represent the beauty of Art Nouveau, However, the fringes that came out through the holes ruining the lace and creating entirely new textile for the collection.

Study of Movement

With just simple knot and tangle it was tried to creat new textile, rather than clean hanging deatil on the bottom of garments.

Study of Drapes

These are the study of shape and form construction of the coat. Most of the look has fitted waist line which represent the idea of oppression of the working class.

Stamp Collage with Fringe

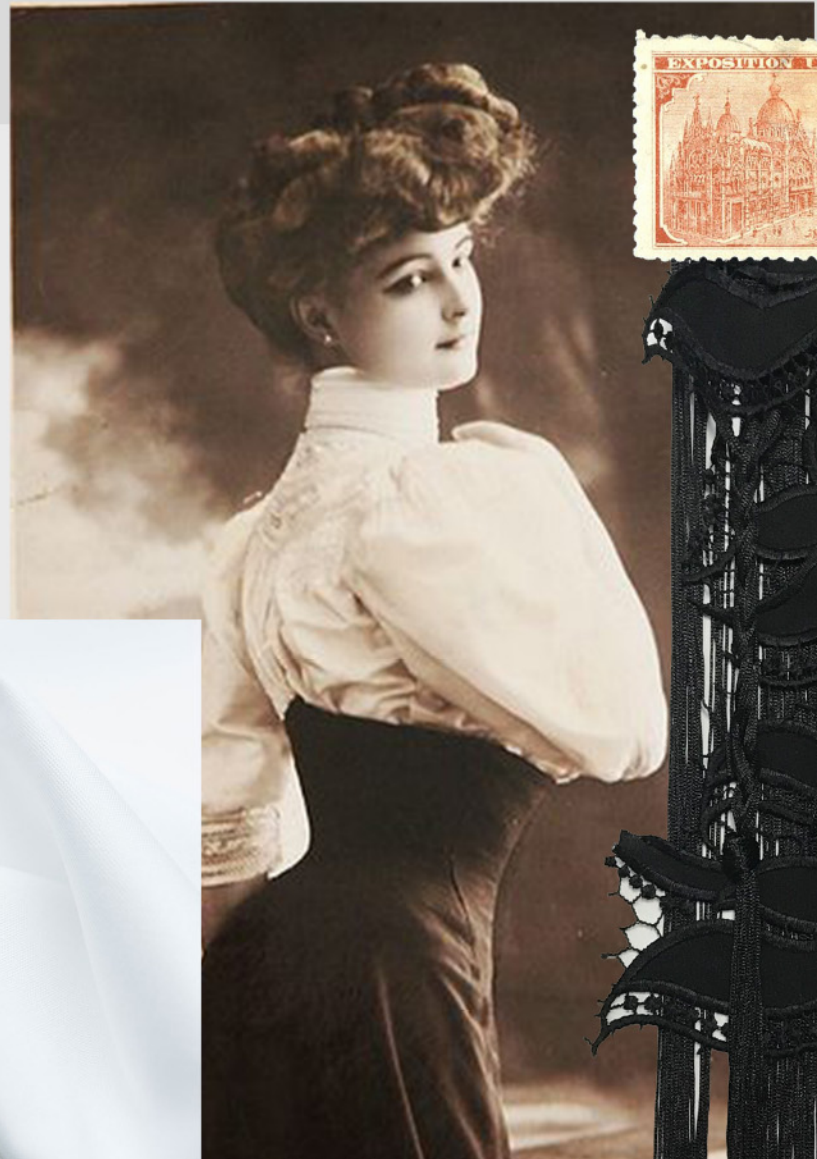

Another Idea inspired by fallen Art Nouveau and Exposition Universelles.

Exposition Universelles was huge successful of French government to show its power and imperialism however, it caused lot of sacrifices from the working classes.

Fallen Art Nouveau

Inspired by fading identity and sacrifice of working class Parisienne of the time. Liquefy detail print on the top of hand collaged work of Art Nouveau pieces by the artist, Eugene Grasset.
